Investments that are readily realisable and intended to be held for not more than a year are classified as current investments. All other investments are classified as long-term investments. Current investments are carried at lower of cost or fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognise a decline other than temporary in the value of the investments.

I. Inventories

Stores and Spares are valued at lower of Cost or Net Realizable Value.

J. Borrowing Cost

Borrowing costs are directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale and are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

K. Retirement and other employee benefits

- i. Retirement benefits in the form of Provident Fund and Superannuation Fund is a defined contribution scheme and the contributions are charged to the Profit and Loss Account for the year when the contributions to the respective funds are due. There are no other obligations other than the contribution payable to the respective funds.
- ii. Gratuity and Leave Encashment liability are defined benefit obligations and are provided for on the basis of an actuarial valuation on a projected unit credit method.
- iii. Short term compensated absences are provided for based on estimates. Long term compensated absences are provided for based on actuarial valuation. The actuarial valuation is done as per projected unit credit method.
- iv. Actuarial gains/losses are immediately taken to profit and loss account and are not deferred. Payments made under the Voluntary Retirement Scheme are charged to the Profit and Loss account immediately.

L. Income Tax

Tax expense comprises of current and deferred tax. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India. Deferred income taxes reflects the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years.

Deferred tax assets and liabilities are determined based on the difference between the financial statements and tax bases of assets and liabilities, as measured by the enacted / substantively enacted tax rates. Deferred tax Expense / Income is the result of changes in the net deferred tax assets and liabilities.

Deferred tax assets are recognised only if there is a virtual certainty backed by convincing evidence of realisation of such assets. Deferred tax assets are reviewed as at each balance sheet date and are appropriately adjusted to reflect the amount that is reasonably or virtually certain to be realised.

M. Earnings Per Share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

N. Provisions

A provision is recognised when an enterprise has a present obligation as a result of past event; it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

SCENARIO IN INDIA

Bulk liquid Storage scenario

With the Indian economy expected to clock a GDP of 8.5% the production of petroleum products are to go up substantially in the near future. India has a large exportable surplus of petrol and naphtha but has shortage of diesel and kerosene. The private refineries have to use storage tanks for distribution to the domestic market as well as for export to avoid investments in tank terminals at various locations. There is an increase in the domestic manufacture of petrochemicals and chemicals and export / import thereof, resulting into an additional demand for tankage from this sector. Additionally, the re-export of imported chemicals by domestic traders has come up as a new development in the recent years. The per capita increase in income of Indian population is leading to increased consumption of edible oils and hence there is rise in import of edible oils, both crude and refined oils. The demand for storage facilities for bulk liquids is thus ever on the rise.

INDUSTRY STRUCTURE & DEVELOPMENT

The Company has 2 bulk Liquid Chemical Terminals with a combined capacity of 127,000 Kilo Litres (KL) in 64 tanks at Kandla, Gujarat, which include specialised tanks, such as stainless steel tanks and tanks equipped with heating and insulation facilities and coated tanks. The Company has plans to add capacities of about 7000 KL at its Terminal No.I in Kandla and have approached the concerned authorities for permissions.

OPPORTUNITES & THREATS

Whilst the demand for storage tanks is on the rise, the biggest impediment in creating new tankage is restricted availability of land at port locations. All the ports are going for SEZ complexes, which need large tracts of land and infrastructural facilities in terms of rail and road connectivity, warehouses for dry cargo and container terminals. However, the Company has been able to overcome this problem by getting an allotment of about 10 acres of land at Kakinada in Andhra Pradesh and by purchasing about 16 acres of land in Pipavav port in Gujrat and is thus free to expand bulk liquid storage capacities to tap the growing demand for the same. The Company plans to develop both dry and liquid cargo storage at these locations.

OUTLOOK

Diversification opportunities

The existing Companies in this business, expecting the demand to boom in the near future are trying to increase capacities. Similarly, the Company has already increased its capacity to 127,000 KL. Additionally, the Company plans to develop bulk liquid terminal at Pipava, Gujarat. As the container volume at Pipavav is on the rise, the Company is also planning a container freight station at Pipavav.

FINANCIAL PERFORMANCE

The information relating to the financial performance of the Company is provided in the Directors' Report.

INTERNAL CONTROL SYSTEM

The Company has an appropriate internal control system for its various functions with the ultimate objective of improving the efficiency of operations, better financial management and compliance with all regulations and applicable laws. The Company has an internal Audit Cell and has also appointed an external Internal Auditor. All operating parameters are well defined and monitored periodically.
